

Introduction Video

University of Aalto

Context:

- Text underlined with dashes are links
- Acknowledgements at the end of the presentation
- Text using Noto Serif are supposed to be “creative” elements
- List of tables, images, and links are in the Appendix at the end.
 - Download the presentation from Link to slides: GitHub:pawarherschel/UniOfAalto:condensed-slides.pdf to view them.

Criteria	Rank	Score*	Raw Score
Gameplay	2	3.286	3.600
Presentation	2	3.469	3.800
Creativity	3	2.739	3.000
Enjoyment	3	2.921	3.200

Table 1: Coventry University Game Jam Results

Judge Feedback:

Visually nice platformer game with a pixel art approach and switching characters that allow either melee or ranged attacks. Multiple levels make it interesting and force the player to master their jumping and attacking skills. There is a final boss for the finale. One improvement I would suggest is that I was unsure what caused me to change between the characters - I was not sure if it was timed, depending on where I was in the level or a button press. Well done to all involved in the game and the hard work you put into it!

Continuous Change

≡ Output Metadata

number of labels in the DOT file:

1835 labels

total lines in the DOT file:

102,560 lines

size of svg:

33.7 MB (35,402,018 bytes)

png output code (using typst):

```
#page(height: (7680pt * 5), width: (7680pt * 5))[
    #image("dot_edge_no_label.dot.neato.with_sand.svg")
]
```

size of png produced:

3.34 GB (3,597,062,134 bytes)

= Current Interests

- WGPU – an implementation of WebGPU spec in rust – to offload work to the gpu
- Cranelift – an alternative to LLVM – creating custom scripting languages for game engines
- Stateless Abstractions – Inspired by NixOS, functional programming, WGPU – Creating good abstractions which reduce cognitive load
- Technical art – bridging programming, art, and mathematics – I am fascinated by gpus and shaders
- GPGPU – Hardware Acceleration – Offloading tasks and doing them in parallel
- Giving technical talks – Inspiring Others – Kate Compton inspired me, and I want to inspire others, just like her (video)

= Why Aalto

and also acknowledgements

= Acknowledgement

- fivepb for helping me push through when I wasn't able to
- mlembug for going through the script
- Shashank for checking the presentation
- Divyesh for checking the script, presentation, and video
- Henna for helping me practice and pushing me towards getting higher education
- and many many many other people

= Heavily Inspired by

- [Acerola](#) for the general vibes of the presentation
- [No Boilerplate](#) for the introduction

Made with ❤️ using

- [typst](#) [Typst](#) – an alternative to LaTeX – // sorry couldn't figure out how to do make the logo visible
- [投Touying](#) [Touying](#) – Slides
-  [Catppuccin Theme](#) – Colors 
- [JetBrains Mono](#) – General font
- [Noto Serif](#) — Font for more “creative” aspects
